(.), please insert --leaving one-half slots 1/2 57 in each

of the discs 40H and 40I--.

Page 10, between lines 11 and 12, please insert

--As is clearly shown in Figs. 2 and 4 to 6, the length of each of the bridges 58 to 61 and 81 is greater than the width of the slots 57 punched between adjacent discs. This greater length of each bridge is due to its having at least a portion which is out of alignment with the longitudinal center line of the strip, as illustrated by the chevron and arcuate shapes shown in Figs. 5 and 6. This greater length than the slot width (or distance between the adjacent edges of two discs) enhances the ability of the bridges to stretch or contract (see Fig. 5) and thereby change the width of the slots and the between-center dis-

IN THE CLAIMS

tance between adjacent discs. --

Please amend Claims 1, 3, 5-10 and 15-17 as follows:
